

Your Tourism Training Partner

OUR KEY PRIORITY AREAS

- strengthen industry pathways for students to build careers in tourism
- develop a tourism workforce plan
- build the capabilities of tourism businesses
- increase the digital capabilities and connectivity of tourism businesses.

In developing a tourism workforce plan, we are committed to:

- completing the analysis of the current and future skills required to support the tourism industry
- identifying options for trainee development in the tourism industry
- preparing a tourism workforce plan with short-term and long-term priorities that focus on identified skills gaps.

“ MTTEC focused on addressing skill deficiencies among our employees, then developed their capabilities and increased our overall efficiency. ”

We focus on providing training solutions for issues like geographic distance, lack of resources or inability to provide time off to attend training. Technology is one way to mitigate the impact of these barriers. Our online courses, web-based workshops and self-directed training can increase accessibility for training and development.

This is coupled with practical training opportunities to ensure effective outcomes for both the student and the employer.
